

District heating opportunities in Perth & Kinross Council

- Stakeholder Engagement Event

June 22, 2016

Venue: Birnam Institute, Dunkeld

Event Summary

Scotland has a commitment to deliver 11% of its heat from renewable sources by 2020. This presents a real opportunity to develop the Heat Industry in Scotland and bring about both economic growth and reduce carbon emissions. This event will allow the developing Scottish District Heating supply chain to identify opportunities in Perth and Kinross to meet, share knowledge and expertise and to forge future collaborations to help reach Scotland's renewable energy targets and deliver the Council's ambitions for sustainable, low carbon energy.

Attendees

Those highlighted in green either gave a presentation or facilitated one of the table discussions.

Name	Organisation	
Adam Baxendine		
Adam Swainbank	Savills	
Ailie Callan	Scottish Enterprise	
Allexander Dewar	SEPA	
Andrew Ballantine	Dupplin Estate	
	Perth & Kinross Council	
Athol Tracey	A & J Stephen	
Carolyn Deasley	•	
Charlie Drysdale Christian Koch	Pinnacle Power BRE	
Conor Byrne	Springfield Properties	
Dave Park	Vital Energi	
David Mackay	SCARF	
David Stobbs	Springfield Properties	
David Westwood	Biz Cat UK	
Duncan Macrae	Caledonia Housing Association	
Eleanor Peters	Home Energy Scotland	
Gordon Dick	Zero Waste Scotland	
Graham Esson	Perth & Kinross Council	
Guy Milligan	HOBESCO	
Howard Mapperley	Inventa Partners	
Jakki Cosgrove	GS Brown	
James Haigh	Bio Geo	
John Ferguson	Eco Idea M	
John Marsh	Metropolitan	
Ken Brady	Energy Saving Trust	
Kevin Jackson	Stewart Milne	
Marina Fraser	Synergie-Environ	
Mark Conway	NHS	
Mark Richardson	Ristol Consulting	
Martin Macdonald	AJ Stephen	
Mary Mitchell	Perth & Kinross Council	
Matt Bridgstock	John Gilbert Architects	
Mike Thomas	Hwyl Energy Consulting	
Neil Kitching	Scottish Enterprise	
Osbert Lancaster	Osbert Lancaster	
Paul Moseley	Scottish Futures Trust	
Peter Marshall	Perth & Kinross Council	
Robert Wills	Perth & Kinross Council	
Roddy Hamilton	Carbon Trust	
Ruth Bush	Stratego	
Sarah Perfett	Perth & Kinross Council	
Sarah-Jane Mcarthur	Brodies LLP	
Sheena Jamieson	SEPA	
Steve Hunt	Ener-Vate	
Steven Rankine	Flex Energy	

The project "Multi level actions for enhanced Heating and Cooling plans – STRATEGO" (IEE/13/650/SI2.675851) is co-funded by the Intelligent Energy Europe Programme of the European Union and the Scottish Government.

Agenda and presentations

Time	Session		
10:45 am	Arrival, registration, tea/coffee		
11:15 am	Welcome & Introduction		
Speaker session: Context & opportunity			
11:20 am	Strategic Overview – Peter Marshall, Perth & Kinross Council		
11:40 am	<u>Case study: a successful district heating scheme in Scotland</u> – Guy Milligan, HOBESCO		
Workshop: 0	Challenges to delivery		
11 :55pm	Stages of district heating development		
12 :00	Discussion session : 2030? What went wrong & why?		
12:40 pm	Plenary: feedback on main points from each group		
Speaker sess	sion: Design for district heating		
1:00 pm	Architecture and District Heating – Matt Bridgestock, John Gilbert Architects		
1:15 pm	Lunch		
Speaker sess	sion: Funding, delivery & management		
2:00 pm	Ownership, funding & delivery options – Paul Moseley, Scottish Futures Trust		
2:15 pm	Experience of different delivery models in practice – Howard Mapperley, Inventa Partners		
Workshop: 0	Workshop: Getting it right, now		
2:30 pm	Activity in table groups		
3:05 pm	Plenary: feedback on main points from each g <mark>roup</mark>		
3:15 pm	Activity & brief plenary discussion: how confident are we that objectives will be achieved?		
3:25 pm	Get tea/coffee and take it to seats for		
Prospects &	priorites		
3:35 pm	Reflections from experts and speakers		
3:55 pm	Plenary discussion on priorities		
4:25 pm	Closing remarks		
4:30 pm	END		

The project "Multi level actions for enhanced Heating and Cooling plans – STRATEGO" (IEE/13/650/SI2.675851) is co-funded by the Intelligent Energy Europe Programme of the European Union and the Scottish Government.

Minutes of the workshop outputs

Interest And Demand

Issues	Solutions		
Confidence/Consistency in Energy Policy - Lack of clarity of energy policy ROI	Carbon Based Incentives		
Lack of regulatory regime			
Consumer Education	Introduce Change into Society and Educate		
Understanding about district heating -marketing?	-trust?		
Collaboration	LA/SG/Private / deveopers		
Joining up actions/all relevant stakeholders "seeing the big picture" Fuel poverty; low carbon; energy security; health	Culture change Co-ordinated publicity /marketing/policy/legislation For both confidence in policy and understanding.		
Financial/Commercial Challenges - Linking private and public sector	General procurement route for delivery / operation		

Additional sheets not on wall: 1) Interest: lack of clarity of energy policy ROI; integrated development plan to mix heat use. Demand: pricing strategy wrong; lack of consumer education; financial modelling/valuing.

2) Pricing Strategy Wrong

Issues	Solutions			
Lack of Investment / Flawed Business Models	(Green) Market Efficiency			
	More knowledge sharing			
Partnership Failure	- Agency			
	- Code of Practice commercial (CIBSE)			
Over Reliance on Public Sector Delivery				
	Heat Netwo <mark>rk Partnership</mark>			
Policy and Leadership Failure (EU exit)	-EST			
	-SFT			
	-Scottish Er	nt		
	-Highlands	and Islands Ente	erprise	
	- Scot Gov			
	FACILITATION			
	Policy: Carrot and Stick			

Feasibility

Issues	Solutions	
Policy Environment	Regulation:	
-planning policy role – supportive?	- Public sector assets / large developments .	
- using public sector estate effectively – anchor	Planning system: presumption in favour of	
loads -> enhances financial viability	connection	
	- Heat producers – requir <mark>ement to use surplus</mark>	
	heat (PPC regs)	
	- Carbon taxes – must dri <mark>ve behavioural change</mark>	
Capturing / valuing benefits	Behaviour Change	
- Energy security	- Education / awareness	
value of a hedge against future fossil fuel	- Publicise existing success stories	
prices	more case studes	
do the public value these?	- Create consumer demand – which will	
- If not housebuilders wait.	influence housebuilders	
Brokerage		
-heat users		
-heat providers		
- how to bring together?		
- incentivised to collaborate?		
Customer experience	-protection	
-standards	-lack of regulation	
Consistency/ rigour / quality of feasibility	Feasibility studies	
studies	- More consultation with <mark>clients</mark>	
	- Ask the right questions	
	- Summary report	
	- avoid delays / re-work – must support	
	decision making process.	

The project "Multi level actions for enhanced Heating and Cooling plans – STRATEGO" (IEE/13/650/SI2.675851) is co-funded by the Intelligent Energy Europe Programme of the European Union and the Scottish Government.

PERTH & KINROSS COUNCIL

Build, operate and maintain

Issues	Solutions		
Consistency between design, procurement and	Consistency through the process of decision,		
operation	delivery, operation etc		
	- Holistic contract structure (clear KPIS – for		
	removal too)		
	- Design for optimum, life operation (not Cap		
	Ex)		
	- Robust specifications		
Customer perception of choice	-heat security – confidence		
-demonstrating value	- tranpar <mark>ency</mark>		
Whole life approach	Independent, non-biased scrutiny		
- Not cheapest capex	- Eg. Inve <mark>nta partners</mark>		
- Short termism	- OFGEM led – commercial viability/design		
	audit		
Walk away mentality	-short termism		
-instead of circular economy			
Knowledge transfer	Who? Designer / Operator involved		
- Design, product specs (we reinvent wheels)	throughout? Bought in the ESCO long term		
Convenant Strength of DH provider	Shared Competency Entity		
	- Partnered with industry		
	access quality support		
	- Facilitator between different projects		
Assumptions	Risk averse design -> over sizing = expensive		

The project "Multi level actions for enhanced Heating and Cooling plans – STRATEGO" (IEE/13/650/SI2.675851) is co-funded by the Intelligent Energy Europe Programme of the European Union and the Scottish Government.
