

UK District Energy Vanguards Network Event

Defining network efficiency

Wednesday 24<sup>th</sup> January 2018

Vanguards 24th January - Leeds.

Working in Partnership with LOGSTOR UK

## Our business

---

### District Heating

### District Cooling

### Oil & Gas

### Industry

# Our Value Propositions

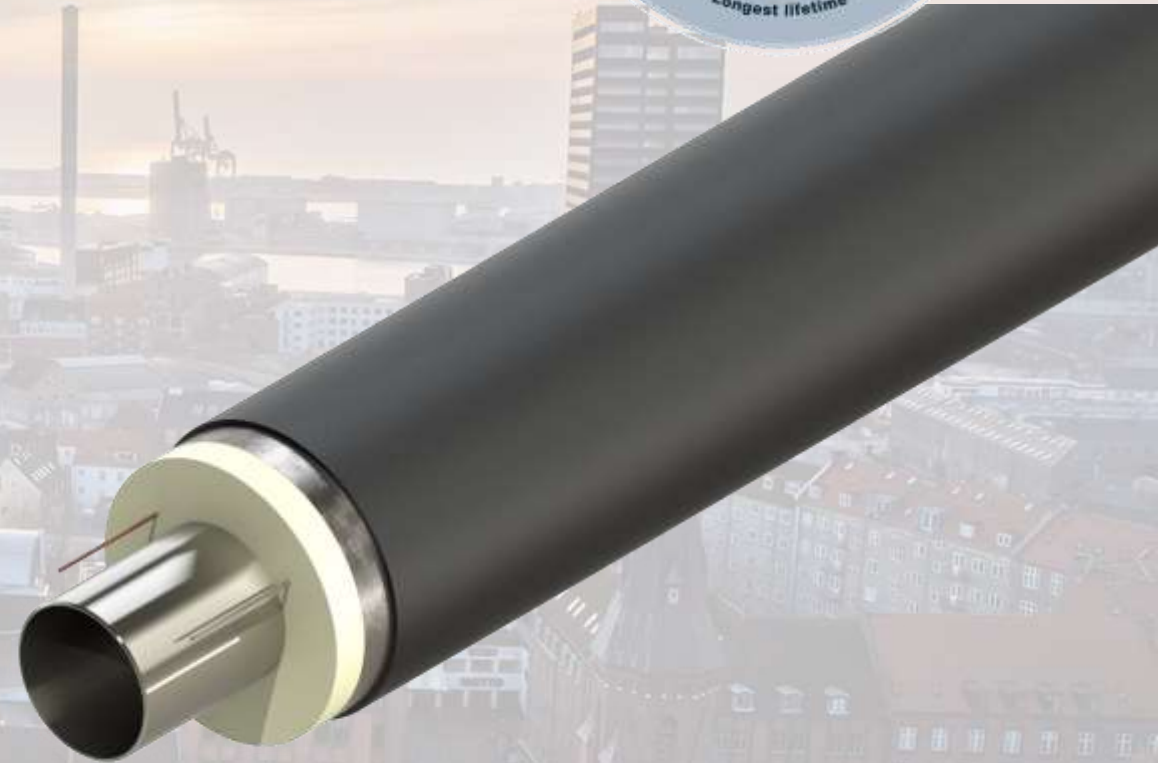

The LOGSTOR Group

## Life time protection of the insulation

- The efficiency of the system must last all through the lifetime
- Low heat loss and thereby lower operating costs
- The built in diffusion barrier:
  - prevents ageing of insulation properties
  - reduces heat loss
  - increases energy efficiency
  - ensures stable operating costs

• Diffusion barrier in the complete system incl. pipes, pre-fabricated fittings and joints • For the benefit of the environment – higher energy efficiency equals lower consumption of energy sources
